1 Introduction

2 Preliminaries

2.1 Variational Quantum Algorithms

2.1.1 Variational Quantum Compiling

2.2 Optimizers for Variational Quantum Algorithms

3 Barren Plateaus

3.1 Barren Plateaus in Gradient-Free Optimization

4 Mutually Unbiased Bases

4.1 Generation of Mutually Unbiased Bases

4.2 MUB States as an Exhaustive Search

5 MUB Utilization Techniques

5.1 Using All MUB states

5.2 Sampling k MUB states

5.3 “Half-MUB” states

6 Experiments

6.1 Control Group: Random Initialization Vectors

6.2 Experiment 1: Reproducing the Arrasmith Barren Plateau

6.3 Experiment 2: 3 qubits and n layers

6.4 Experiment 3: n qubits and n layers

7 Discussion
